

## Hundred Dollars

\$100 - Most counterfeited money denomination in the world. Keeps the world moving.

Ten Thousand Dollars

\$10,000 - Enough for a great vacation or to buy a used car.

One Million Dollars

\$1,000,000 - Not as big of a pile as you thought, huh?

Still this is 92 years of work for the average human on earth.

One Hundred  
Million Dollars  
\$100,000,000  
- Plenty to go  
around for  
everyone.  
Fits nicely on an  
ISO / Military  
standard sized  
pallet

One Billion Dollars

\$1,000,000,000 - You will need some help when robbing the bank.

Now we are getting serious

One Trillion Dollars      \$1,000,000,000,000

When the U.S government speaks about a 1.7 trillion deficit - this is the volumes of cash the U.S. Government borrowed in 2010 to run itself.

Keep in mind it is double stacked pallets of \$100 million dollars each, full of \$100 dollar bills. You are going to need a lot of trucks to freight this around.

If you spent \$1 million a day since Jesus was born, you would have not spent \$1 trillion by now...but ~\$700 billion- same amount the banks got during bailout.

## One Trillion Dollars

Comparison of \$1,000,000,000,000 dollars to a standard sized American Football field and European Football field.

Say hello to the Boeing 747-400 transcontinental airliner that's hiding on the right.

This was until recently the biggest passenger plane in the world

15 Trillion Dollars      \$15,000,000,000,000- Unless the U.S. government fixes the budget, US national debt (credit card bill) will topple 15 trillion by Christmas 2011. Statue of Liberty seems rather worried as United States national debt passes 20% of the entire world's combined GDP (Gross Domestic Product). In 2011 the National Debt will exceed 100% of GDP, and venture into the 100%+ debt-to-GDP ratio that the European PIIGS have (bankrupting nations)

114.5 Trillion Dollars

\$114,500,000,000,000. US un-funded liabilities To the right you can see the pillar of cold hard \$100 bills that dwarfs the WTC & Empire State Building both at one point world's tallest buildings.

If you look carefully you can see the Statue of Liberty. The 114.5 Trillion dollar super-skyscraper is the amount of money the U.S. Government knows it does not have to fully fund the Medicare, Medicare Prescription Drug Program, Social Security, Military and civil servant pensions. It is the money USA knows it will not have to pay all its bills. If you live in USA this is also your personal credit card bill; you are responsible along with everyone else to pay this back. The citizens of USA created the U.S. Government to serve them, this is what the U.S. Government has done while serving The People. The un-funded liability is calculated on current tax and funding inputs, and future demographic shifts in US Population. Go to
